DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 1-4 and 7-12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Nesbitt (6,663,509). Nesbitt discloses a golf ball comprising a core, an inner cover layer, and an outer cover layer. The inner cover layer may be made from thermoplastic or thermoset polyurethanes such as those available from Pebax. The flexural modulus for the layer is at least 30,000 psi or 206 Mpa. The inner cover layer has a thickness from 0.01 to 0.10 inch or 0.254 to 2.54 mm. The outer cover is made from a thermoplastic resin and has a Shore D hardness of 55 or less. The elongation is considered an obvious feature since the materials are similar and the flexural modulus is within applicant's range. One of ordinary skill in the art would have varied the elongation for the desired performance features.

Allowable Subject Matter

Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/776,528

Art Unit: 3711

Response to Arguments

Page 3

Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Raeann Gorden whose telephone number is 571-272-4409. The examiner can normally be reached on M-F 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Greg Vidovich can be reached on 571-272-4415. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
